APRIL
BIODIVERSITY AND THE ENVIRONMENT

- (1) ***** is keep America beautiful month.
 - (2) ***** is one of the most common medicines and is used to help ease aches and pains.
 - (3) ***** indicates the variety of living things.
- A way to (4) ***** water is by taking showers instead of baths.
- In April, we change our time to (5) ***** savings time.
- (6) *** is an important genetic material contained in the cell nucleus.
- Conserve (7) ***** by walking or biking instead of driving.
- Your (8) ***** is your surroundings.
- Rainforest (9) ***** could offer an alternative to expensive pesticides.
- All living things are (10) *****
- One place where scientists work is called a (11)*****.
- A (12) ***** uses the sea as an outdoor laboratory.
- At least one-quarter of all medicines found in our drug stores come from rainforest (13) ***** and animals.
- A (14) ***** is a type of a tropical forest.
- (15) ***** items such as newspaper, glass and yard waste.

APRIL
BIODIVERSITY AND THE ENVIRONMENT

- (1) **April** is keep America beautiful month.
- (2) **Aspirin** is one of the most common medicines and is used to help ease aches and pains.
- (3) **Biodiversity** indicates the variety of living things.

A way to (4) **conserve** water is by taking showers instead of baths.

In April, we change our time to (5) **daylight** savings time.

- (6) **DNA** is an important genetic material contained in the cell nucleus.

Conserve (7) **energy** by walking or biking instead of driving.

Your (8) **environment** is your surroundings.

Rainforest (9) **insects** could offer an alternative to expensive pesticides.

All living things are (10) **interdependent**.

One place where scientists work is called a (11) **laboratory**.

A (12) **marinebiologist** uses the sea as an outdoor laboratory.

At least one-quarter of all medicines found in our drug stores come from rainforest (13) **plants** and animals.

A (14) **rainforest** is a type of a tropical forest.

- (15) **Recycle** items such as newspaper, glass and yard waste.

APRIL CROSSWORD PUZZLE
BIODIVERSITY AND THE ENVIRONMENT

ACROSS

- 3 All living things are this.
- 6 One of the most common medicines and is used to help ease aches and pains.
- 9 This individual uses the sea as an outdoor laboratory.
- 13 items such as newspaper, glass and yard waste.
- 14 A type of tropical forest.

DOWN

- 1 Your surroundings.
- 2 One place where scientists work.
- 4 Rainforest could offer an alternative to expensive pesticides.
- 5 Conserve by walking or biking instead of driving.
- 6 Keep America beautiful month.
- 7 An important genetic material contained in the cell nucleus.
- 8 A way to water is by taking showers instead of baths.
- 10 An indication of the variety of living things.
- 11 In April, we change our time to savings time.
- 12 At least one-quarter of all medicines found in our drug stores come from rainforest and animals.
