1. A disease that attacks selected cells in the immune system and produces defects in function.
2. The twelfth month.
3. The condition of lacking a usual or needed amount.
4. An abnormal condition caused by an infection, genetic defect or stress.
5. Belonging to the family Felidae, which includes lions, tigers jaguars and wild and domestic cats.
6. The virus that causes acquired immunodeficiency syndrome.
7. Protected against a disease, poison, or the like, as by inoculation.
8. A disease of the white blood cells.
9. The study of organisms that can not be seen by the naked eye.
10. A person educated and trained to provide care, treatment, counseling and health education.
11. French chemist who is considered the founder of modern microbiology.
12. To keep from happening.
13. Symbol for the fight against AIDS.
14. To take a chance.
15. Either of two times of the year when the sun is at its greatest distance from the celestial equator.
16. A set of symptoms indicating a disease.
17. A type of white blood cell that helps fight infection.
18. The act of sending from one place or person to another.
19. A preparation that causes the body to make antibodies to specific diseases organisms, when injected or taken orally.
20. Tiny particle of protein and genetic material that is too small to be seen with a microscope.

DECEMBER

1. AIDS A disease that attacks selected cells in the immune system and produces defects in function.
2. DECEMBER The twelfth month.
3. DEFICIENCY The condition of lacking a usual or needed amount.
4. DISEASE An abnormal condition caused by an infection, genetic defect or stress.
5. FELINE Belonging to the family Felidae, which includes lions, tigers jaguars and wild and domestic cats.
6. HIV The virus that causes acquired immunodeficiency syndrome.
7. IMMUNE Protected against a disease, poison, or the like, as by inoculation.
8. LEUKEMIA A disease of the white blood cells.
- 9 MICROBIOLOGY The study of organisms that can not be seen by the naked eye.
10. NURSE A person educated and trained to provide care, treatment, counseling and health education.
11. PASTEUR French chemist who is considered the founder of modern microbiology.
12. PREVENT To keep from happening.
13. REDRIBBON Symbol for the fight against AIDS.
14. RISK To take a chance.
15. SOLSTICE Either of two times of the year when the sun is at its greatest distance from the celestial equator.
16. SYNDROME A set of symptoms indicating a disease.
17. TCELLS A type of white blood cell that helps fight infection.
18. TRANSMISSION The act of sending from one place or person to another.
- 19 VACCINE A preparation that causes the body to make antibodies to specific diseases organisms, when injected or taken orally.
20. VIRUS Tiny particle of protein and genetic material that is too small to be seen with a microscope.

DECEMBER

AIDS AWARENESS MONTH

ACROSS

- 3 The act of sending from one place or person to another.
- 4 A person educated and trained to provide care, treatment, counseling and health education.
- 5 To take a chance.
- 6 Tiny particle of protein and genetic material that can not be seen with the naked eye or a microscope.
- 7 To keep from happening.
- 11 The study of organisms that can not be seen by the naked eye.
- 13 French chemist who is considered the founder of modern microbiology.
- 15 A set of symptoms indicating a disease.
- 18 The condition of lacking a usual or needed amount.
- 19 Protected against a disease, poison, or the like, as by inoculation.
- 20 A disease of the white blood cells.

DOWN

- 1 Any preparation that causes the body to make antibodies to specific disease organisms when injected into a person or animal.
- 2 Either of two times of the year when the sun is at its greatest distance from the celestial equator.
- 8 A type of white blood cell that helps fight infection.
- 9 An abnormal condition caused by an infection, genetic defect or stress.
- 10 The virus which causes acquired immunodeficiency syndrome.
- 12 Belonging to the family Felidae, which includes lions, tigers, jaguars and wild and domestic cats.
- 14 A disease which attacks selected cells in the immune system and produces defects in function.
- 16 Symbol for the fight against AIDS.
- 17 The twelfth month.
